

### Features and Benefits

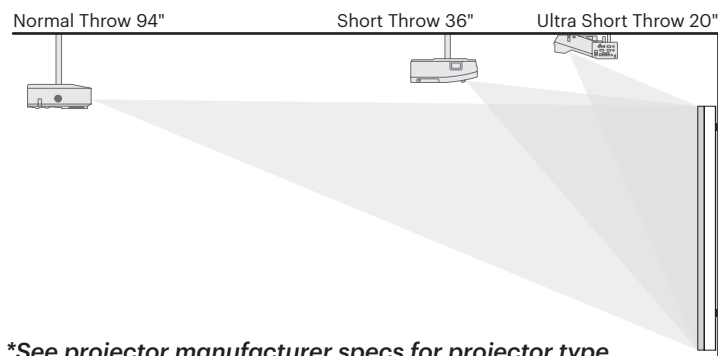

- **Weight:** 2.6 lbs per square foot
- **Glass Gauge:** 4mm
- **Glass Type:** Tempered Low Iron
- Ships from North Carolina
- Markerboards are supplied standard with a magnetic surface that can be used with any rare-earth magnetic accessories
- Gloss and matte finishes
- The matte finish is short throw projectable
- Matte finish is achieved with a light etch process
- Standard and custom digital printing options

### Color Options

### Projectable Surface

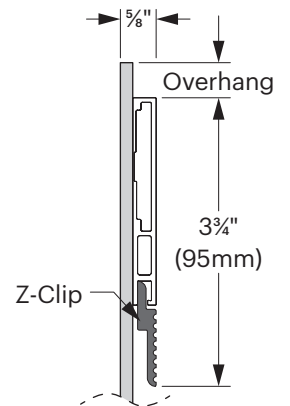

3form Markerboards are able to function as a projectable surface. For optimal performance, a matte finish and a short throw projector are recommended.

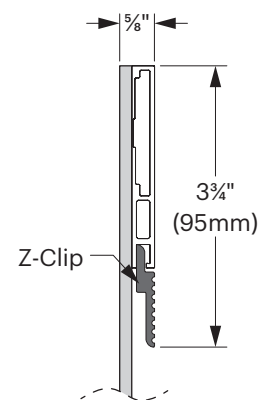

*\*See projector manufacturer specs for projector type.*

### Mount Styles

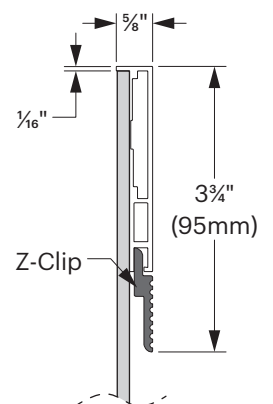

#### Floating

#### Flush

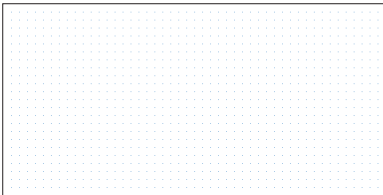

#### Framed

*\*Available for standalone markerboard only 300.45*

### Digital Print Options

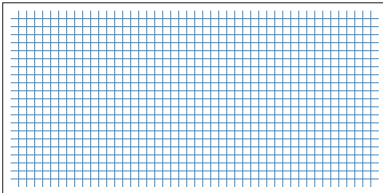

- **5 Standard Grid Options:** Available in Gloss Finish Only. Default color for Grid Patterns in Chalk. Grid patterns will maintain a 2" print free border around the perimeter of the markerboard. (see patterns below)

DottedLine

LineGrid

OldSchool

PlusGrid

- **3form Image Collection:** Choose an image from the 3form Image Collection to be ghosted. Standard image opacity is adjusted to improve writability. (example image below)

- **Custom Logos and Branding**

### Optional Accessory Kit

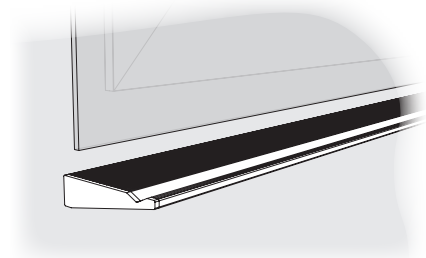

Rare earth magnet accessories are available as an add-on option from 3form.

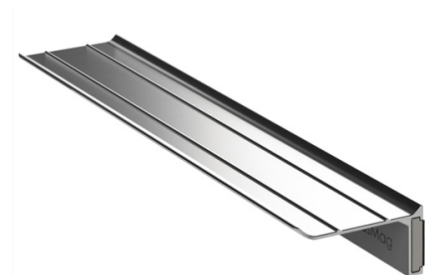

- **White GlasMag Accessories**
- **Tested Strength:** accessories hold on ¼" thick Glass Markerboards
- **Functional Design:** accessories made to meet the needs of the modern workforce
- **Quality Magnets:** accessories use the strongest magnets commercially available
- **Magnetic Pawns:** hold up your best work by securing up to 20 sheets each
- **Magnetic Eraser:** easy to hold and handle, wipes away mistakes with effortless erasing
- **Magnetic Marker Holder:** fits up to 8 dry-erase markers and has an anti-slip traction pad

### Optional Accessory Shelf

Made to size, up to 120" lengths.

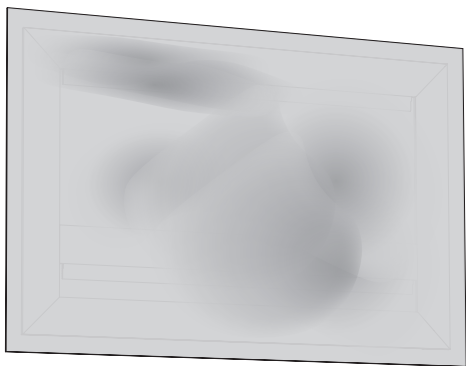

### Optional 12" Magnetic Tray

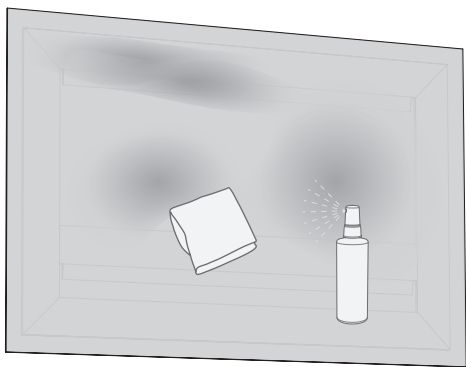

## Cleaning Instructions

Erasable markers, such as Rite-On markers, contain an ink that dries instantly and should be easily erased. After a period of use, a film or haze will develop on the surface of the board, which is the result of the ink residue that might not be completely removed when the board is erased. Different types of markers, and even different colors, will leave behind more residue. Matte finish markerboards will retain this haze much more than gloss finishes, and will require a wet erase much more frequently.

By using a spray-on type of glass cleaner, the board may be given a thorough cleaning. Simply spray the surface and briskly rub with a clean microfiber cloth.

Rinse with clear water. Avoid using caustic or abrasive types of cleaners.
